

LW46 Hybrid

Perfect in every detail!

STRENGTHS

- › Design, technology and construction 100% made in Italy
- › Use with battery and cord for non stop working
- › High efficiency motors for the longest running time
- › Maneuverable and light, just guide it and it goes by itself!
- › Removable water tanks on the body frame
- › The world's lowest base housing profile 230 mm (9 inch)
- › Superior working capacity 1500 sqm./h (16,000 sqft./h)
- › Scrub and dry to the wall on the side and in front
- › Dries perfectly on turns, thanks to the easy glide suction nozzle
- › Quick brush roller and squeegee replacement without tools
- › The body frame turns to fold the machine for transport in a vehicle
- › Light weight and low noise level

MAINTENANCE WITHOUT TOOLS

The easy glide suction nozzle turns in the opposite direction of the machine in order to thoroughly pick up the water.

It can be removed without tools and the squeegee can be rotate for 4 side use resulting in maximum cost reduction.

The machine has one high speed brush roller (1200 RPM) exposed in front for baseboard cleaning.

It is dynamically balanced and can be replaced in a few seconds without tools. The brush pressure is adjustable.

REMOUVABLE WATER TANKS MOUNTED ON THE BODY FRAME

The light blue solution tank is equipped with measuring cap.

The front recovery tank is equipped with a float system and a motor protection filter. All filters are antiseptic treated to eliminate bacteria's, fungi's and dust mites on contact.

The body frame is easily adjustable 160° for maximum operator manoeuvrability. It allow easy access under tables and low furniture and allows the machine to fold for transport in a vehicle.

ON BOARD BATTERY CHARGER

The machine is 100% Hybrid and it works with battery or a power supply with a 15mt. (50ft) cord on board.

The recharging time after a complete discharge is reduced to 3 hours instead of the 12 hours of GEL battery.

On down time it is possible to recharge the batteries without waiting the complete discharge.
